Math

Make a measurement like the one below. Choose an object in your house and either draw it, take a picture of it, or cut it out from a magazine. Your measurements could all be in one unit (i.e. cm) or a variety of measurements (i.e. kg, m, mm, etc.). Include at least four measurements. I was able to do five measurements in this example:

This box is 29 cm high, 72 mm deep, and 18 cm wide. It holds about 1000 pieces of cereal and weighs 300 g.

Language Arts

Think of examples when you are expected to say thank you. For example, receiving presents, someone holding a door open for you, someone cleaning up after you, someone preventing you from getting hurt, etc.

Then write about one of the following:

a) write a letter to someone for a simple act of kindness that really happened to you

or

b) should you always say thank you, even if you don't appreciate it? (i.e. you receive an unwanted present, someone makes you dinner that you don’t like.)
